GDP vs Population Growth from 2013-2018

Limitations

1. Our analysis took into account growth rates from 2013 to 2018, not accounting for specific data that happened between those two time periods.
2. CoronaVirus
3. Census Data API was different for every year, and made it difficult to add substantial data.
4. GDP (US Bureau of Economic Analysis) and Pop data (US Census) are from different sources.
